## PROFESSIONAL EXPERIENCE

---

**Software Engineer - mBank (fixed-term contract)** **04.2024 – 12.2024 (Remote)**

I work on developing and maintaining software solutions that ensure the integrity and confidentiality of banking systems. My role involves implementing authorization features to safeguard sensitive data and mitigate cyber risks, ensuring compliance with industry standards.

**Software Engineer - N-iX (Metro bank)** **07.2022 – 03.2024 (Remote)**

Developing microservices for a UK-based bank to automate the car loan application process. My role involves designing, developing, and deploying these microservices, ensuring they're scalable, reliable, secure, and adhere to the bank's standards and best practices. We integrate our microservices with several third-party services such as credit checks, car history checks, customer identity verification, and others.

**.NET Developer - Homebook.pl** **08.2021 – 05.2022 (Remote)**

Designing, developing, and maintaining the server-side of the platform. My daily tasks included creating APIs, integrating with third-party services, optimizing database queries, and ensuring system scalability and security.

**Junior Full-stack Developer - EG A/S** **05.2020 – 07.2021 (Warsaw)**

At my first job as a software developer, I worked alongside highly experienced team members and learned from their expertise. We developed an application utilized by Danish municipalities which enabled the creation of intricate online forms, which citizens could then fill online. I worked in close collaboration with my team members to produce high-quality code..
